

Annual Church Check-Up

Introduction

Do you ensure that your car is given a regular service and tune? If you attend a gym, you probably have an occasional fitness test. Perhaps you visit your GP for an annual check-up? We recognise the value of regular check-ups in many areas of life. They help us to see how things are going and to address minor issues before they escalate. They also encourage us to celebrate what's going well. Similarly, it is good for church leaders to review how their church is going.

The statements below are designed to encourage reflection and stimulate discussion on how the church is going.

Not everyone will have the same understanding of the meanings of the words. This is an opportunity to develop a common language and understanding of these terms.

This is intended to be general set of statements to use as a guide. Not all the questions may be relevant to your particular church. Feel free to adjust these questions to suit your unique situation.

Who is this guide for?

It is for church leadership teams wishing to do a quick annual church health check-up. If you would like to do a more in depth and thorough health check, contact our BUV's Church Health and Capacity Building Team.

How to use this tool

Have each of your leadership team download and fill out the health check statements on their own.

For each statement and following sentences, circle the number that you think best applies to your church – 1 meaning, "This is not at all true of our church" and 5 meaning, "This is completely true of our church." Write a short explanation for your rating.

Have an extended time together as a leadership team discussing individual answers to the statements and what you could or will do in response to the discussion.
