

INTRODUCING CAPTIONING CONCIERGE BY BRADLEY REPORTING

The rapid spread of coronavirus has left many churches across the country looking for reliable solutions to protect parishioner health. COVID-19 is now impacting face-to-face contact and, increasingly, worship is shifting online.

More than ever, churches are looking to deliver accessible online services and the firms that provide these services.

As the impact of coronavirus worsens, we know our clients will value reliable and responsive service delivery.

Bradley Reporting is well positioned to integrate our remote live captions into online services and livestreams, having delivered over 15 years of trusted live stenocaptioning and subtitling services to organisations nationally and internationally.

Our company has built its reputation on concierge-level customer service and support, which begins the moment a client first contacts us. Our staff ensure supports are tailored to individual preferences.

CHURCHES MOVING TO ONLINE SERVICES

CAPTIONING CONCIERGE now offers clients 24-7 access to a customised portal and telephone help service from 0830 to 2030 daily. Designed originally as an online FAQ service, with telephone support, the site has evolved into a one-stop-shop for placing and tracking orders, uploading video and audio files for processing and downloading completed orders.

Alongside our remote live captioning services, CAPTIONING CONCIERGE provides a convenient means of having video and audio recordings transcribed. We can provide copies of transcripts as keepsakes for sermons and funeral services.
